

Way Forward

*Future Targets of
Weather Radar Network in SE Asia
and
the Next Workshop (TBD)*

Three pillars of future possible collaboration

After returning to your country, what can you do?

1. Report to your boss (most important).
2. Share training materials, presentation files and final report with your colleagues.
3. Discuss internally how you improve radar data (i.e. check maintenance program, QC process etc.)
4. Discuss internally how you can join the regional radar composite (i.e. check data policy, data format, communication capability etc.)
5. For any questions, contact the coordinator of regional WIGOS project (Mr Kakiyama of JMA)
